Specialized treatments for Chinch Bugs, Grub Worm, Mole Crickets, Sod Web Worms and Fire Ants are not included in your lawn service program and priced out separately if needed.

Granular Potash application feeds the root system and helps the roots grow deeper & stronger and more tolerant to drought, insects and disease.

Palm Tree service includes applying granular 13-3-13 mix to all non-native palm trees. Drenching and Injections are not included in this service. We do not treat hardwood trees or Cabbage/Eureka palm trees.
